PLEASE NOTE: This part of the registration system can be glitchy and you may experience the following "runtime error".

```
Server Error in '/' Application.

Runtime Error

Description: An application error occurred on the server. The current custom error settings for this application prevent the details of the application error from being viewed remotely (for security reasons). It could, however, be viewed in the browser if the remote address is the same as the current user's address. To enable the details of this specific error message to be visible on remote machines, please create a <customErrors> tag within a <web.config> configuration file located in the root directory of the current web application.

<!-- web.config configuration file -->
<configuration>
  <system.web>
    <customErrors mode="Off"/>
  </system.web>
</configuration>

Notes: The current error page you are seeing can be replaced by a custom error page by modifying the <customErrors> attribute of the application's <system.web> configuration tag to point to a custom error page URL.

<!-- web.config configuration file -->
<configuration>
  <system.web>
    <customErrors mode="RemoteOnly" defaultRedirect="mycustompage.htm"/>
  </system.web>
</configuration>
```

If this happens then click the back arrow on your internet browser
Then click on the blue CONTINUE button at the bottom of the page
